Overview

This profile describes enrollment trends, student performance, income levels, population, and other characteristics of the Hubbard-Radcliffe public school district.

The report utilizes publicly-available data from the Iowa Department of Education, the Iowa Department of Management, and the U.S. Census Bureau. Historical trend data have been aggregated and allocated where possible to align with school district consolidations through the years.

Neighboring District Comparisons

For selected indicators, Hubbard-Radcliffe district values are compared to those of neighboring school districts. The comparison group includes the ten public school districts nearest to Hubbard-Radcliffe. Those districts are listed below.

Neighboring District Comparison Group

<table>
<thead>
<tr>
<th>AGWSR</th>
<th>Iowa Falls</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alden</td>
<td>Nevada</td>

<td>12.0</td>
<td>14.5 - 16.3</td>
</tr>
</tbody>
</table>

### Notes:

1) Unless otherwise noted, data in the District Quick Facts tables were obtained from Iowa Department of Education (IDE) tabulations for the 2012-2013 academic year. Readers are encouraged to visit the IDE Web page (at http://educateiowa.gov/) for more detailed data and documentation.

2) In order to avoid confusion arising from differences between Iowa Department of Education and U.S. Census Bureau practices for reporting race and ethnicity, enrollment figures by specific race group are not reported here. More detailed tabulations of enrollment by race may be obtained directly from the Iowa Department of Education Website (http://educateiowa.gov/).

3) Small Area Income and Poverty Estimates (SAIPE), U.S. Census Bureau, 2011. SAIPE data are reported using point estimates for district-level poverty rates and a 90-percent confidence interval for the state-level rate. See the Data Notes for more information about the sources of poverty data appearing in this report.

</tbody>
</table>

### Notes:

4) **Valuations for FY 2013 School Budgets, Iowa Department of Management.**

5) **Staff members with teaching position codes (TPC) may also serve in additional administrative or support capacities.**

6) **Regular salary covers direct position responsibilities and includes teacher salary supplement and professional development. Total salary includes regular salary plus extra salary paid for extracurricular and extra duties.**

7) **Graduates in the 4-year cohort include first-time 9th grade students in fall of 2008 who graduated in 2012 or before, plus students who transferred into that cohort and graduated in 2012 or before. Dropout rates measure the percentage of students in grades 9-12 who dropped out during the one-year period beginning October 1, 2011.**
Adequate Yearly Progress (AYP) in Reading and Math

The Iowa Assessment Reading and Math Tests are used to evaluate adequate yearly progress of students in Iowa's school districts. The following charts illustrate the percentage of Hubbard-Radcliffe students designated as “proficient” or “advanced” in reading and math based on their standardized test scores for 2012. Source data were obtained from the Iowa Department of Education.

Reading Proficiency by Grade, 2012

Math Proficiency by Grade, 2012
Recent Enrollment Trends

Hubbard-Radcliffe: PK-12 enrollment benchmarked to 1997-1998

Neighboring Districts (aggregated total): PK-12 enrollment benchmarked to 1997-1998

State of Iowa: PK-12 enrollment benchmarked to 1997-1998
Enrollment and Percentage of Enrollment by Grade, 2012-2013

Projected Changes in Certified Enrollment
(as a percentage of 2012-2013)

The Iowa Department of Education projects an overall gain of 0.9 percent in Hubbard-Radcliffe certified enrollment through the next five academic years, from a baseline of 427 students in 2012-2013.

Note: Certified enrollment may differ from total enrollment values reported elsewhere in this profile. See the Data Notes for more information.
The decennial population census, last conducted in 2010, provides the most accurate data available on school district population size; population by age, race, and ethnicity; and number and types of households and families. The following table summarizes 2010 Census data for Hubbard-Radcliffe.

### American Community Survey Profiles, U.S. Census Bureau

The American Community Survey (ACS) is an ongoing survey of households conducted by the U.S. Census Bureau. The ACS supplements the decennial census program by providing more up-to-date and detailed socio-economic data for the nation, states, and smaller geographic areas. Published ACS estimates for small areas such as school districts represent rolling averages of survey responses received during a five-year data collection period. The most recent ACS data release describes average conditions during 2007-2011.

ACS estimates are derived from a sample of the population, as opposed to a complete enumeration. To reflect the degree of sampling error inherent in the survey process, the Census Bureau reports a margin of error (MOE) value with each published ACS estimate. This report applies the MOE values in two ways: (1) to construct a 90-percent confidence interval showing lower and upper bounds for an estimate's likely values, and (2) to calculate a coefficient of variation (CV) score for each estimate. The CV score, a ratio of the standard error of an estimate to the estimate itself, provides a convenient way to evaluate whether the sampled population was of sufficient size to reasonably represent the true population.

The following tables contain ACS demographic and income data for the district. Readers should evaluate any published ACS estimate within context of its CV score, as indicated by a color-coded data quality flag. Estimates with a CV greater than 50 percent are not recommended for use; however, readers may decide for themselves whether the data quality for a given measure is adequate for their specific needs.
## Demographic Profile, 2007-2011 American Community Survey

Data Notes and Sources

- **Current and historical enrollment** data were obtained from the Iowa Department of Education’s Basic Educational Data Survey (BEDS) tabulations. These values may differ from certified enrollment totals, which are used for allocation of state funding and other administrative purposes.

- **Projected enrollment** data, describing expected short-term changes in certified enrollment, were obtained from the Iowa Department of Education.

- **Adequate Yearly Progress (AYP), teaching staff, and student** data such as eligibility for Free or Reduced School Lunch and English language proficiency were obtained from the Iowa Department of Education.

- **Property tax rates** were obtained from the Iowa Department of Management.

- **Poverty** data were obtained from the Small Area Income and Poverty Estimates (SAIPE) and American Community Survey programs, both administered by the U.S. Census Bureau. The SAIPE estimates are preferred for official reporting of student poverty rates and for allocation of Title I funding. The ACS data provide additional detail to help characterize poverty levels among individuals and families within the district.

- **Other population and income data** were obtained from the 2010 Census and the American Community Survey, U.S. Census Bureau.
